Busworld Europe 2025: Voith Turbo Division Commercial Vehicles makes its debut under new brand name Driventic

2025-10-01

- From November 1, 2025, Driventic will operate on the market as a legally, organizationally and operationally independent company
- Driventic as specialist for drive technologies in the commercial vehicle industry
- Focus on expanding e-mobility business and reinforcing market position in the field of conventional drive solutions
- Active driver of the mobility transition: "Mobility beyond today"

HEIDENHEIM, GERMANY. The Voith Turbo Commercial Vehicles Division – which will operate as an independent company under the Driventic brand name from November 1, 2025 – will present itself and its future product portfolio for the first time at Busworld Europe 2025 in Brussels. This means that the new brand will be introduced to an international audience of industry professionals ahead of its official launch.

"Busworld Europe is our most important trade fair for the commercial vehicle industry. We are therefore especially pleased to be able to present Driventic there for the first time under the new brand name and give customers, partners and suppliers an initial impression of our future identity," says Dr. Gregor Wiche, CEO Commercial Vehicles (soon to be Driventic).

Specialist for drive technology

Driventic is positioning itself worldwide as a specialist for efficient drive technologies in the commercial vehicle industry and a driver of the mobility transition. Under the brand claim "Mobility beyond today", the company will provide a preview of its new identity for the first time at Busworld Europe 2025.

With a future-driven and customer-focused product portfolio for trucks, buses and off-highway applications, the global player aims to significantly advance

the transformation of mobility – as an innovative driving force, uncompromising trailblazer, and active partner.

Response to a market in a state of flux

As an independent company, Driventic will be better placed in future to make faster decisions, act more flexibly, and respond in good time to new market developments.

“Above all, we will push the further development of electrical drive systems. At the same time, we intend to secure and expand our strong market position in conventional solutions so as to be able to offer customers future-proof products in both areas of technology,” stresses Dr. Gregor Wiche.

Portfolio redefines efficiency and sustainability

The product range comprises integrated systems and digital services that are redefining efficiency and sustainability in the commercial vehicle industry. All solutions are technological refinements and advancements of Voith products. They include the electrical drive systems VEDS and VEDS 1.5, automatic transmissions DIWA and DIWA NXT, retarders and air compressors, the TurboCompound transmission solution, and Hydrodamp vibration damper.

Thanks to the agility that its future independent status will provide, and the professionalism of a highly qualified team, Driventic is in an ideal position to take global mobility to the next level in collaboration with its partners.

The standard for best-in-class efficiency: VEDS and VEDS 1.5 – Driventic's electrical drive systems consisting of HD motor and drive inverter system.

DIWA NXT: The next generation of the legendary DIWA automatic transmission offers improved efficiency and even lower fuel consumption.

About Driventic

Driventic is the specialist for efficient drive technologies in commercial vehicles. Whether for use in e-mobility or conventional drives, Driventic's complete systems and digital services are drivers of the mobility transition – because they enable manufacturers and operators alike to sustainably operate their trucks, buses, and off-highway vehicles. The company's 1,400 employees at 27 locations in 19 countries are dedicated to one mission: to combine ecology with technological progress in the service of efficiency.

This is what Driventic understands by "Mobility beyond today".

Starting on November 1, 2025, Driventic will operate on the market as an independent company. The company, which is based in Heidenheim, Germany, is a spin-off of parts of the drive systems division of international technology group Voith. All Driventic's products, systems and digital services are technological refinements and advancements of Voith solutions.
